April 27, 1981.

This facility is a production center for General Motors Auto Parts.
No hazardous waste is generated here. Any product returned to the facility
from a dealership is resold, returned to the factory, or given to one of the
local training centers. Nothing is wasted.

The inspector explained how to be deactivated from the system and gave
Jon Minkoff's address to Mr. Green. Mr. Green stated that he would contact
the home office and advise them of this option. Mr. Green stated that the
other two Denver locations are also nongenerators.
